Special Engineered Fully Flexible High Volume Production Line

- 2 layer driven sensor controlled unwinder with integrated quick splice system
- sensor for material end detection
- integrated automatic pleat height control and automatic pleat height adjustment
- multiple ultrasonic sealing and cutting device with integrated waste rewinder
- digital high performance blade pleater with extended exit heating system
- pneumatic half automatic high speed cross cutter
- complete pleating production line synchronized and one man operated
- easy to change, easy to handle, easy to control
